Education

Northern Arizona University

Software Engineering. 4.0 GPA

Relevant Coursework: Data Structures, Database Systems, Principles of Languages

Flagstaff, AZ

Expected May 2028

Experience

Musi Inc.

Bug Bounty

Remote

November 2022 - October 2023

- Identified and helped fix a major bug in their data extraction service.
- Supplied proof of concepts and methods to expand their data extraction service to support many other music services.

Leadership & Activities

First Robotics

Sierra Vista, AZ

Club President + Lead Software Developer

January 2022 – May 2025

- Led the software development team using Java and interoperated closely with the hardware team to create robots that are both teleoperated and autonomous.
- Demonstrated the effectiveness of NVIDIA Omniverse's synthetic data generation to develop a real-time AI object detection model rapidly.
- Fundraised \$20,000, which led to the club reaching the semifinals of the competition.

Projects

Illusion137/Illusi

October 2022 – Present

- Built a full-stack mobile music app using React Native with Expo and TypeScript, and SQLite.
- Designed a modular cross-platform data extraction pipeline to create normalized music data from major streaming platforms.
- Integrated error logging using Sentry.

Illusion137/Roze

March 2024 – Present

- Developed a high-performance TypeScript + Node.js CLI that converts EPUB, PDF, DOCX, TXT, and Syosetu web-novels into audiobooks or audio-visual books with subtitle files and YouTube chapter timestamps.
- Created a batch voice synth engine that can generate ~9 hours of realistic narration in ~5 minutes.

Illusion137/Everett

February 2026 – Present

- Created a Desmos-like calculator with dimensional analysis evaluation over multiple related expressions, built in C++ with WASM support for high-performance math parsing on the web.
- Integrated the Web Assembly code into a TypeScript + React + Tauri frontend.
- Optimized the bundle size to be 27% smaller and 22% faster than the Desmos scientific calculator.

LuanRT/YouTube.js (Open Source Contributions)

August 2026

- Integrated a large scale core YouTube client to a codebase with over 140,000 weekly downloads.

Skills & Interests

Technical: Typescript(NodeJS React-Native React NextJS), C++, Java, Python, SQL(PostgreSQL, SQLite), HTML, CSS, Git, Sentry

Interests: Software Development, Robotics, Film Writing, Film Editing, Art
